CIS Learning Center Update

RETIRED COURSES AND REPLACEMENT COURSE LIST

Our learning content vendor, Skillsoft, retired 87 online courses on December 22. Click here for the list of the retired courses and their replacements. The spreadsheet contains four tabs of information: a complete list, safety courses, IT courses, and an alphabetical listing of all new courses.

Some courses did not have an exact replacement, so this was an opportunity to add a few new and different topics to the catalog. Be sure to browse the new replacement titles to identify the courses you want to assign, if you are removing a retired course.

The retired courses were archived on December 22. Please check to be sure you have removed or unassigned all of the retired courses from any Learning Plans and Bundles. Then you can replace them with the new courses.

The Microsoft 2007 courses will stay in the catalog for a couple of months. Our hope is that this will allow any current assignments to be completed.

If you need assistance with replacing courses, contact the CIS Learning Center at 503-763-3800 ext. 8 or via learn@cisoregon.org.
